

ELEMENTS
ENFIELD

SUPERFAST HOME BROADBAND WITH DAY 1 ACTIVITY

*'As soon as I moved into Elements
I was instantly connected to the UK's
fastest residential broadband.'*

All homeowners at Elements benefit not just from superfast broadband from the day they move in, but also three months service and a router free of charge. The router is pre-installed; all you have to do is register online for the service you require, and you'll be connected to the internet usually within 2 hours – with no engineer visit required.

hyperoptic

**Three
months free
service and a
free router**

ABOUT HYPEROPTIC

Hyperoptic is the first broadband provider to offer one gigabit download speeds in the UK. It's also one of the fastest growing providers, on track to reach two million homes by 2022 and five million by 2025. Unlike other broadband providers, Hyperoptic doesn't use conventional, old-fashioned copper phone wires. They are building their own network, specifically designed for the demands of the 21st century and beyond. That means fibre optic cables that go all the way from the phone exchange to your building, delivering the fastest broadband in the UK.

THE SPEED YOU PAY FOR IS THE SPEED YOU GET

Many broadband providers advertise speeds of 'up to', which means the actual speed you receive may be less. Hyperoptic delivers the actual speed you pay for.

TRIED AND TESTED

Hyperoptic has a proven track record in delivering a quality service winning 'Best Superfast Broadband Provider' for the 6th consecutive year at the 2018 Internet Service Providers' Association and voted 'Most Innovative Provider' in 2017 by the web site Broadband Genie.
